

Date: 25.02.2010  
Release date: RELEASE IMMEDIATELY

## **NanoCentral in partnership with IntertechPira brings 4<sup>th</sup> annual NanoMaterials back to UK**

**The leading UK nanotechnology event, focused on commercialisation of nanomaterials, will take place on 8-10 June 2010 at the Hotel Russell in London, UK.**

Remaining loyal to its conceptual origins, NanoMaterials2010 will focus on the commercialisation of nanomaterials, rather than theoretical benefits. This is what sets it apart from other events and makes this event an ideal platform to bring together the academia and the industry.

Following its well-established format from previous years, the event will commence with 3 pre-conference workshops, followed by 2-day conference comprising 2 plenary sessions and 4 application-focused symposia.

Plenary sessions will present leading senior industry figures examining key issues that affect the entire supply chain - from regulations to the business strategy. Presentations will also be given by researchers that have made incredible breakthroughs recently and will provide a glimpse into the latest technologies and developments that could benefit your business.

4 parallel symposia will focus at:  
Coatings, Inks and Pigments  
Printed Electronics  
Composites and Plastics  
Clean Technology

The line-up of speakers will include Dr Paul Atherton of NanoVentures, Prof Geert Van Calster of Leuven University, Dr Chris Shennan of Hexcel, Dr Piers Andrew of NOKIA Research Centre, Peter Kruger of Bayer Material Science, and many others to be announced soon.

The speakers' recruitment is under way. For more information or to submit an abstract, please contact Robert Stead at IntertechPira at [robert.stead@pira-international.com](mailto:robert.stead@pira-international.com).

NanoMaterials2010 will also grow its exhibition and will also comprise a **poster display**, and various **networking opportunities**.

More details of this event can be found at its official website – [www.nanomaterials2010.com](http://www.nanomaterials2010.com)

### **About IntertechPira**

**IntertechPira** provides events, market research, publications, strategic and technical consulting to niche, emerging and high growth industries.

Market coverage includes lighting and displays, clean energy, home and personal care, industrial biotechnology, performance materials and chemicals. IntertechPira is a division of Pira International.

**IntertechPira Events** – knowledge, networking and opportunity.

IntertechPira events combine productive networking, high calibre presentations and targeted marketing opportunities for key decision makers across the globe in niche, emerging and high growth industries. Market coverage includes lighting and displays, clean energy, home and personal care, industrial biotechnology, performance materials and chemicals.
